

Energy Week @ RMU!

The Great Energy Race

High school Engineering Summer Camp

July 18-20, 2016

10am – 3pm

\$Free

Maximum of 15 students

Robert Morris University; John Jay Center

During this three day camp, led by Dr. Tony Kerzmann and Dave Sanchez, students will learn about global warming, energy efficient vehicles, hydrogen electrolysis, natural gas and electricity.

Students will also design, build and race their own energy efficient cars, as well as build a water purification system.

Camps funded through Constellation – E2 Energy to Educate

Energy Ties

Middle School Engineering Summer Camp

July 21-22, 2016

10am – 3pm

\$Free

Maximum of 15 students

Robert Morris University; John Jay Center

During this two day camp, led by Dr. Tony Kerzmann and Dave Sanchez, students will learn about global warming, weather and climate, carbon footprint and take part in several energy demonstrations.

Students will also build a weather station and solar oven.
